	Subject	Pineview Estates - Draft Report	

Aaron,

I waited for Mr. Tom Robinson- but at this point haven't heard a thing.

Please take a look and let me know if there is anything I should revise or add additional comment

Mr. Tom Robinson said due to land constraints on the disposal area - the system was sized to make it fit the number of homes??

Without regular pumping and some modifications I'm not convinced the large "B" system will meet a 30-30 BOD-TSS requirement. And the nitrogen just isn't

going to be consistently possible

I'll be in the office the remainder of the day.

Dave
